OTHER INFO

Polypropylene (PP) is a thermoplastic polymer produced via chain-growth polymerization from the monomer propylene, with unique properties such as thermal insulation, water and chemical resistance, high strength, multiple impact resistance and recyclability. PP products have the advantage of being able to be used for reheating food in the microwave.

Storage conditions: storage in closed rooms, sanitation, dry, away from any source of contamination and protected from direct sunlight, heat and high temperature variations – Handling with maximum caution to avoid damage, hitting, punching products.
