

Removal of excreta stains with HETI Desipesu Pro

Secretions on surfaces may be rich in microbes. This is why excreta stains should be removed as soon as possible after they occur and always before cleaning.

Take out a HETI Kuitupyyhe and HETI Desipesu Pro to remove excrement stains.

Wear a protective glove on the active hand. Soak up the secretion in the HETI Kuitupyyhe and clean the dirty area of visible dirt with a clean HETI Kuitupyyhe.

Put the towel in the mixed waste with the disposable glove.

Apply a generous amount of hand sanitizer and massage all over your hands until they are dry. (20-30 s).

Handle the Desipesu Pro with a passive hand only. Spray the stain with HETI Desipesu Pro. Wipe the spot with a clean HETI Kuitupyyhe.

Put the towel in the mixed waste bin. Pull the protective glove inside out from your hand and put it in the mixed waste. Wash and disinfect your hands.
